

but I think some 270 are
doing the same. several people
have already traded there
rifle off and got others.

I like my rifle it shoots
real good. but really I am
afraid of it now.

Please let
me know if anyone
else has had any
trouble with there
rifle.

P.S. The rifle does not go off
all the time when pushing the
safty button. maybe it will
never do it again. and it
could get worse. Please let me know
what you think.

Thank You
