WITH THE BULLET STRIKING THE GROUND IN FRONT OF HIM. LUCKILY THE GUN WAS POINTED DOWN OR SOMEONE COULD HAVE SUFFERED SEVERE INJURY OR DEATH !!

THE SAFETY WENT OFF WITH JUST A BUMP OF THE HAND, AS DIAGRAM INDICATES: -

THE SAFETY WAS RELEASED BY THIS PART OF THE HAND, WHEN HE FELL FORWARD. IF THESE SAFETY'S ARE MEANT TO PROTECT, THERE NEEDS TO BE SOME REDESIGNING. THE SAFETY IS IN THE WRONG AREA ON THE STOCK !!

LOOKING AT YOUR OTHER REMINGTON'S, THREE OF WHICH I OWN, THEIR SAFETY'S, BOLTS, AND EXTRACTORS ARE MUCH SAFER AND BUILT BETTER. WHY BUILD A WEAPON, EVEN THO IT IS A LESS EXPENSIVE
