STOMER'S REQUEST *fine on bolt closing*

IN FAULT *Cannot duplicate complaint. However, trigger assembly has been tested outside of factory. Trigger pull manual at 2 1/2 pounds - this is below per minimum spec; poor travel & excessive; rear engagement does seem altered, but appears O.K. Removal of hardened action from sight revealed not on bottom of barrel, on action and on trigger assembly. Sear lift, O.K.*

Clean up action & barrel, replace trigger assembly at N/C, as gesture of good will

Please expedite, per K.O.G.
