J.A. STEKL

Dear Mr. Stekl,

We have a rifle that misfires when it is extremely cold.

The safety was on, then when my husband pushed the safety off the gun fired on its own, causing considerable damage to our pickup. I know after this happened, my husband is somewhat afraid to use it again.

We have heard that Remington has a recall on guns like this one.

Ours is a Remington 700 270 Win. caliber rifle. Serial number 6726979.

We would appreciate any information you can give us about this.

Thank you
Mrs. Forrest Boydston
