

I took the Remington 243 in the ~~forest~~
 wood on Nov 22-70. I saw a small
 deer got down to one knee squeeze
 the trigger. it was a mix I thought
 the cage was of because the land side
 from my to S.L. but the island is
 small I didn't want to try to light it
 in for safety reason. So on Nov. 23~~rd~~
 I took my Winchester Model #74.
 I use standard velocity for squirrels and
 I took a hand full of mini mag 22 hollow
 point for any thing else. at six o'clock
 that morning I had fed six squirrels
 I had seen two squirrels going around a
 large pine tree so I was trying to see
 just on inch of it move around and
 up the tree. When I got the corner of my
 eye saw white thing wrong. So I turn
 around to look. and that is when I saw
 these two deer. 75 yards away jumping
 up and down shaking their tail. I says
 to them don't go away stay right there
 I took out the standard velocity and put
 in two mini mag 22 rifle hollow point.
 I aim for between the eye but the bullet
 drop in so much it went down. I could get
