

Remington
Model 700
7 mm MAG ADL
6590847

Dear Remington,

The problem with this
gun is the Hammer will
Release when I take it
OFF OF SAFETY. It first
happened when I went
to UNLOAD IT AFTER Hunting.
This is AN OLDER MODEL SO
YOU HAVE TO HAVE THE SAFETY
OFF TO RELEASE THE Bolt.
WHEN I SWITCHED it to
Fire it went OFF. It's
Also happened ~~several~~ A
couple more times. This is
very Discouraging on my
Thoughts on Remington Firearms.
