Attention: Product Information

Gentlemen:

I purchased a Remington Model 700 BDL some 20 years ago. I have never had a problem with it until my last hunt. After subjecting the rifle in its scabbard to a tremendous jolt (when my horse walked into a tree), it discharged when a round was chambered.

I am writing for 2 reasons:

- (a) I am scared to death of the rifle now, and
- (b) I need to know what caused it.

Can you help?.

Sincerely,
Robert F. Butler
