To whom it may concern, I have a
model 600 Rem 222 cal. Rifle that has started
firing upon the release of the safety! This has not
only happened to me, but I have a friend who
borrowed this gun when we went hunting. After
loading the rifle, we started to get out of the car and
the rifle went off, blowing a hole into my cars front
passenger side floorboard and transmission. I
myself personally think that this is not right
whatsoever and something definitely needs to be
done about it right away. I also can have
signed statements if necessary. also while target
shooting this incident occured again. This gun
needs to be replaced before someone gets hurt or
worst than that killed.

~~P.S. I keep~~

P.S. I expect something
to be done immediately!
