ATTN: CUSTOMER SERVICE MPT.

Dear Sir,

I purchased a Hammington 7 MM Magnum 3 years ago from Andrews Sporting Goods in Anaheim. Since that time the rifle has misfired on 3 different occasions.

The first year I owned the rifle, I was deer hunting in California when it misfired. The second time it misfired, I sent it to G & A Gun Specialties in Garden Grove for repairs. They could not find any reason for this to happen (see attached receipt).

Then just last month, I was deer hunting in Utah. When, in the process of pushing the safety lever, the rifle discharged again. This time causing injury to my thumb.

I checked with Andrews Sporting Goods about a possible recall and they informed me there wasn't one. Considering the injury that could result from this problem, I feel that the rifle should be replaced.

Please reply.

Sincerely yours,

Joe Lemay, Owner
