Dear Sirs:

My Remington 700 went off when I chambered a round. The weapon went off in my house and sent through the wall. Fortunately noone was hurt.

This particular weapon has to have the safety off when chambering a round. I think this is totally unsafe.

Please repair as needed to keep this from happening again.

Thanks very much,

Jim Clark

P.S. I know I should never chamber a round in the house which is also totally unsafe.
