

removed all the bullets. I opened the bolt action, put the safety on, closed the bolt action, released the safety and the firing pin went in like it was firing. I tried that twice and it did the same thing. Now I tried it at home and it's okay.

The gun is new, fired only 3 other times. I'd like to know what is wrong with the gun. I really liked this gun. Please let me know.  
Thank you.
