Mr. Robert Hall

Thank you for taking care of the safety problem on my rifle.

The gun has fired twice when I have taken the safety off. Each time I did not have my finger on the trigger. This is very dangerous and could lead to a bad accident. A friend who I told about the problem suggested a three position safety which inhibits the firing pin instead of the trigger and also has a position where you can open the action to unload the gun without taking the safety off, like you do with the present one.

Please call us if you have a question

Home # 913 649-4279

Thank you

Bill Daniels (Harry Callahan's son in law)
