

7/17/79

Sirs:

I have a 243 caliber 700-BDL Remington rifle, serial # A6537717 that I am sending back to you.

I had been hunting and was getting ready to transport my gun.

There was ~~the~~ shell in the chamber and the safety was on.

I sat down in my truck and at 1 I took the safety off - the gun went off. The bullet blew a hole thru the passenger door and just missed my friend who was ready to get in the passenger door.

I feel Remington Arms Co. is responsible for fixing the door and gun.

Enclosed are pictures of my truck door.

This gun was purchased new from Davis Gun Corral - Brockville, Ohio.
