

Dear Sir.

I own a Remington model 700 Serial no. A6661552.
On 11-26-73 I Fired it 2 times and the third shot I Fired it,
Blew a Big Fire Ball in my Face. I was taken to the
Emergency Room at Floyd medical in Rome GA. The Shell
that Blew Back in my face was about three times louder
than the other ones. I checked the other shells in the Box
lot No. 1124-NB4419 and Found A Hollow Point! (I Marked it)
I Told Bill Conrad that I was afraid of this Gun and I want
a new one. I have missed Part of the Hunting season here.
I am sending the Bills that I have had.

Thank you.
