ON Oct. 31, 1991 at 5:30 PM, I remove gun from case to go out side to sight it in. Wife ask me if I would take out trash and burn. I set gun in corner of wash room and took trash out. Came back into house to get gun. My wife was standing at wash sink when I lifted gun, turn to door and at same time removing safety. Gun fired missing wife about 20" of head. Round hit wall of house about 12" from top of ~~ceiling~~ putting hole of dime inside, have not look at outside. ^{ceiling}

P.S. I would like to have new gun because I would not feel safe with this one. Any other problem with this one and I would have to take other action.
