MAIN FAULT

May 12-70 Unable to duplicate customer concern as rec'd. Trigger pull and trigger overtravel screws have been adjusted outside of the factory and the gun was gummed up in housing. We do not recommend that the trigger be adjusted outside the factory and metal parts should be lubricated periodically with a light coat of light oil. Replace trigger Assy. at special price strictly as a gesture of good will.

PARTS	COMMENTS Trigger pull measured 5 to 5 1/2 LBS as required. see left page 1009 - Some sticks in housing - Bolt Stop sticks
