Model 700 Rifle A6550694
Repair Order R-18993-700

Dear Sir:

We recently received your Model 700, 22-250 caliber rifle, covered by your correspondence of recent date.

We have examined the gun, and we do find the fire control has been altered outside the factory, as we found all the adjustment screws not sealed, as they are preset at the factory.

Therefore, we do feel this did cause a problem, as we found nothing wrong with the components themselves.

The repairs are being done at no charge and we do expect to effect return shipment within one week.

We trust our actions will meet with your approval.

Cordially,

F. D. Cole:cm

Arms Service Division
