

Mr. Potter instructed me to send the gun to you COD by UPS. He also told me there would be no charge for replacing the trigger assembly, and that you would pay the freight back to us. If any of these statements is not true, contact us @ 901-682-3029 before working on the gun.

We have had lots of years of safe hunting with Remington guns; I use your 6mm rifle and have influenced several of my girlfriends to buy them also. My husband and the majority of his deer camp use your .270. As you can see, we are a Remington family, and appreciate the fact that you stand behind what you sell.

Thanks again—
Marianne Kinard
