B.R.W.
BAR • ROD • WIRE DIVISION

Fred, Gun was purchased in 1974, the gun first went off a few years later for my father, upon chambering 1st Round, not cycling rounds during shooting. This does not happen all the time, gun was not used much between 1974 and now.

A couple of years ago, it happened again to my brother, again while chambering 1st Round.

When it went off both times, it happened while pushing bolt to put Round in chamber before bolt was down and locked, forcing bolt back against stop. (Cover)
