

①

April 14, -94

This Gun Model 700,
used several times. The
time I used it was 1980
kept the gun under lock
ever since the mishaps.
I injected a shell in to the
chamber & the gun fired, when
I pulled the bolt. Also misfired
the safety was pressed.
I am very afraid of this gun,
I wouldn't want to sell it for fear
some getting hurt or killed.
I like the gun for a reminder
of the farm.
After I saw the Show 60
times, about Remington model
700, I became concerned after
I saw it. I am mailing it
to you as of our conversation
how, earlier this month.

②

I kept the gun clean & safe as
possible. Please check it out
& if major problems, please notify
me. If it needs adjusted
or what ever, please do so.

Thank you
