

Dear

I called + talked to someone
in the service dept + they told
me to send my rifle + you were
to test it for me

The Problem

After hunting for several hours
with a shell in the chamber

I was going to unload the
rifle and pulled the safety
off and the rifle fired. I
never for once my hand moved
on the trigger, my hunting pack
is made of a nylon like material
and I don't think it caught on
the trigger, I'm not saying that
couldn't have happened. Please
test the gun for me.

Thank you
