MAIN FAULT

on one occasion this weapon fired as I took the safety off

B2					E1	F1
B3					E2	F2
B4				D1	E3	F3
B5				D2	E4	F4
C1				D3	E5	F5

Major 3/88 Unable to duplicate customer concern as noted. Trigger performed normally even when bolt was closed. Exchange trigger at such price as a gesture of good will in order to restore customer confidence in the rifle.

PARTS

COMMENTS

Trigger pull measured 4 3/4 lbs as received. See left was .013

* See engagement was altered (.011) to .011 outside of factory witnessed by difference in V-sealant on firing screws and that of the engagement screw. Sealant on engagement screw was brownish vs clear on front and also contained debris & oil & was softer
