Mr Crosslin came in with this
gun for repair saying it fired
when bolted a few times (3)
I believe: He says this happens
when safety is moved to fire,
pulls trigger and nothing happens,
opens bolt to remove that round
and closes bolt on new round
and it fires, tells me it has
done this 3 times.

times with me, of its own
ing and dangerous but it
ne,

ningtons through the years
was the purchase of a life time
to get rid of this gun and
on. To say that my confidence
understatement. Whatever

happens I doubt that I will ever feel comfortable hunting
with this gun again.

After giving this some thought I didn't want to inflict this
upon someone else and felt you should know about the problem as
am doing this for your benefit as well as the safety of others.

Here is what has happened in the deer stand:

Game appears, I push off the safety and squeeze the
trigger but it won't pull. I check the safety and
