

And comes out for hunting season. This has happened just in the last 5 years. After the first time it does it I will work the bolt and snap the trigger a few times and it works since the next 2 months of hunting season.

It seems to have a sticky trigger mechanism or firing pin or something. I soaked the bolt overnight in a baggy of Hoppies #9 Solvent but it didn't help. I called your office and they told me to write this note and ship the gun to you.

I hope you can solve the problem because I want to keep this gun in my family and give it to my son someday.

If you need more info on how this problem was call me.

Sincerely,
Mike McLean
