

11/22/89

Dear Mr. Sanita,

After our confersation on the Phone about the Accident with the Remiington 7mm Rifle Model # 700 Serial # B 6307034 I feel that the Rifle is unsafe and dangerous.

Not only did it injured my Thumb, wich is still causing me discomfort,it also totally ruined my hunting Trip (Vacation) since this is the only Rifle I had along and 250 miles from home,this Hunting Trip turned out to be a Big disapointment not only did it end after a few hours,it also caused me Pain and it could of turned into a Tragedy, as there where several Hunters along with me.

AS I pushed the safty forward,the Rifle discharged,my Thumb was still on the Switch,with the kick from the Rifle it injured my Thumb.

After unloading the Rifle,it done the same exact thing twice. Therefore the Rifle is unsafe.

Sincerelly
