WOOD			C1	D3	E5	F5
METAL			C2			

MAIN FAULT Mfg 9-88 Pressure should not be applied anywhere on trigger when moving safety lever from safe to fire. Trigger, mainspring pull and overtravel screws have been adjusted outside of the factory. We do not recommend that the trigger be adjusted outside of the factory. Exchange trigger at special price as gesture of good will.

PARTS	COMMENTS Trigger pull measured 2 3/4 to 3 as reqd. Rear lift was .008					
	Stock is not of Remington mfg.					
	Trigger has been changed - but lock safety was not standard in 1988
