

Dear Sir,
I am in Estherville, Iowa
and 660. 1st St. N.E.

A friend of mine was with me
my gun. While the other was
to unload the magazine. He
shot a hole in the magazine.
He says he did not touch the
trigger.

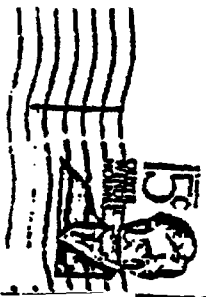

I did not know there
was a possibility of something
wrong with the gun. I
read an article in the paper
regarding it.

Would you please let me
know if the gun is safe.
The gun is in the hands of
some sort of institution. It
should be in the hands of
for the Osmear gun to be
tried.

Thank you for your
