Dear Customer Service:

Please evaluate the accompanying rifle for defects. This fall it fired as I took it off safety in preparation to unload it, though the trigger was untouched. I have since tried to reproduce the malfunction without recurrence, but am hesitant to take it afield until it is checked out. I have heard that there have been recalls in the past for similar problems, but was told my particular rifle was not under recall. The serial number is 6373088 - Model 700 - 7mm mag - stainless barrel. Please call or fax if necessary.

Sincerely,

Bill Nicodemus
