

ROADWAY

 Years of Service

Dear Sir:

Enclosed is a Remington 700 BDL in a 243. Sometimes the gun will miss fire and then some times when on safe or with safe off and you chamber a round it will go off when you close the Bolt.

Please fix. This gun is a couple years old and when the customer was telling us about it and he told us it has done it since he had brought it. I told him to bring it in and we would bend it, because he is scared to use it and didn't blame him.

Please fix under warranty. Call if any questions.

Thank you
