I'm writing to you in reference to a 30-06 my husband gave me in about 1943. The last two hunting seasons I've only ever shot 3 rounds through the gun. The day we got ready to come home I was unloading my gun. I dropped the floor plate and two shells fell out - then I knew there was one more shell in the gun & probably in the Chamber. I started to move the safety & the gun went off! I cut my thumb open & dropped my gun. It had gone off without the trigger being touched.

I was recently talking to a clerk at our local Hardware & he said there had been cases of this happening a few years back & guns were recalled & replaced.

Please advise as I'm concerned about the guns safety now.

Thanks.
