10/27/89

Enclosed is the Trigger I replaced
on 10/26/89.

The owner of the gun was referred to
me by Remington to replace the Trigger.

His complaint was that the gun fired
when he took the safety off. He also said
that after unloading the rifle he was
able to reproduce the "Fire off safe" but
after several times he could not get it to
"Fire off safe" again.

When I disassembled the gun I found no
apparent tampering with the Trigger. I also
could not get the gun to "Fire off safe".
If you have any other questions feel
free to call me

Sincerely

Robert C. Snowball
