Gentlemen:

J.A. STEK

7/1/86

I have carried a stainless steel barrel, "model 700" 300 Winchester Mag. for years. When it was on "safety" it would not open up. My house trailer blew up with my gun in it, and I bought a new gun. This new 300 Winchester Mag. opens up by itself while I'm carrying it hunting. It scares me to see my bolt 'k open.

Is there anything that can be done to correct this problem?

Thanking you in advance for any information, you might send me.

Sincerely yours

Frank S. Peabody
