

Dear Sirs:

4-9-86

Recently Pagma Gun Repair sent
in my .200 Remington to find out why
it discharged when I pushed the safety
off. The rifle has been returned
but I have received no explanation of
what was wrong with it, Is it
the mfrs. mistake or is it something
I could have did? I feel I should
be entitled to an explanation. I
also feel the company should pay
for the \$240.00 damage to my
pickup. If my cousin had taken
a few more steps and been in the
line of fire, this could have been
a very serious situation. Please
let me hear from you soon.
