

December 30, 79

Dear Sir,

In regard to my phone call on Friday September 28, 79 about this gun, I want to again tell you what happened.

28, 1980
N. Y.

On June 29, 79 my son Thomas, age 16 was in the tractor cab and picked up this gun, he couldn't get the bolt open, then he thought it was in safety. He moved the safety lever and the gun went off in the tractor, ruining the air conditioning unit and making a hole in the roof. The loud blast left my son's ears ringing at all times. We took him to a specialist and he said there is permanent damage to the outer ear.

I think the company should fix this gun, and pay for damage to the tractor and something toward my son's ear.

regards,

Dorald P. Reinhardt
