

ase - Remington
 powder - IMP 4350
 undercharge - 81 grains
 Bullet - 150 grain Speer
 Primer CCI 250
 Scope - 2.5x8 Leupold VIII

Five shot group from
 benchrest with sandbag.
 I let barrel cool between
 shots. This is an average
 group that the rifle will
 do. Heavier bullets do
 somewhat better, but not
 much. Any good rifle
 should shoot around 1 1/2 inch
 Please fix it!
