

Dear Mr. Stekl,

I called you last week regarding the safety on this model 700.

You said for me to ship it directly to you so you could look into the problem. I have enclosed a money order for \$15 to have it changed so it can be unloaded with the safety on.

While deer hunting this year I took the safety off to unload the gun and it fired. If I had not been handling the gun properly it could have caused an accident or fatally wounded someone. Please look into this safety mechanism very carefully.

Because I myself know of another model 700 in a 243 caliber that did the exact same thing. I should mention that I am 100 percent satisfied with the Remington fire arms that I own. (over)
