MAIN FAULT

Mfg. 8-71 Closed bolt, squeezed trigger, released safe and firing pin dropped. Note; trigger has no movement when safe and no overtravel. AFTER DISASSEMBLY FOUND that trigger, sear and Bolt stop release were gummed up with shallow like substance and trigger would hardly move. Exchange trigger Assy. at appraisal price as a gesture of good will and to restore customer's confidence in rifle. Metal parts only need a light Film of light oil.
