

To Remington,

Please look this 243 over for me, earlier this year a friend and I were out practicing shooting. He was loading a bullet into the chamber, and the bolt would not close, when he forced it closed it accidentally discharged.

I had never had any problems with this gun, so I thought perhaps he had done something wrong, even though I know he is very proficient while both handling and shooting firearms. This past weekend while deer hunting, a deer was in front of me while I had the gun pointed out the front of the stand up in the air, the gun fired when I took the safety off.

I do not know what could cause this, and I do not wish someone to be injured and I would appreciate your efforts to repair this. If you have any questions please contact me at work: (817) 627-6474 or at home (817) 427-5311.

Thank you,

Kellyc Lynch
