

(2)

the gun went off ok except it went off once, when I closed the bolt and the gun wouldn't go back on safe until I worked another round through it.

This season I jumped a buck and pulled the trigger, nothing happened again.

Then I went to put another shell in, it fired into the ground. This happened three times. Another buck lost!

The gun dry fires and fires fine but seems to act up after being carried hunting. Both times it acted up the temperature was fairly warm. The temperature was in the 40s.

I bought this gun brand new in 1983 and kept -
