J. A. STEKL

Dear Sirs:

I have written before on the above rifle purchased at "Oshamnn" here in Port Lavaca, Texas - purchased Jan. 28, 1983, this letter also has to do with the new safety which does not lock the Bolt on Safe and which I do not like ---- because it is a continious bother of the Bolt coming open when you bump it just so on your body or any thing else, I sent this rifle or rather the store where I purchased it to Houston, Texas to an authorized repair station to have the old type saftey installed - after 2 months the rifle was returned with a note stating that the old style was not any longer available. ~~from the Factory.~~

My question is this: is it a fact that I wont be able to get this part for my rifle? If this is not a fact then let me know the price and availability of the old style safety or how I can get my rifle the way I want it -----because I am very displeased with it with this new type safety, it is true tat it is an added saftey feature -- but at least for me the disantvatge out weighs the safety feature. Thank You.

Respectfully Your

Ralph R. Tanner
