Dear Sir,

on Nov. 8 I sent this letter to someone in Remington, but I have had no answer yet. I do not believe this of Remington. here is my letter.

Dear sir

I am very disappointed in my model 700 - 25-06 bolt action Rem. first of all I wanted a clip be- cause in Minnesota we have to have our guns in cases, so the gun is to slow to load, by the time you get it loaded the deer is gone. I wanted this gun for fox, wolf & deer, because in Minnesota we have to use a 24 caliber or larger for deer. second problem your gun has to be on fire to unload, well yesterday while unloading my gun it went off and went threw my pickup and it did a lot of damage. It went threw the back end, threw cab. up threw the seat, lunch pail and heater and out the front fender. Its a rotten way to have a gun, I hope that
