

to lift the bolt, that would help a
lot at least someone won't get
shot. I am very scared of the
gun. I have been a Remington
man for 28 years. I don't know if
I should look in Browning or
Winchester to look for a 23.26 bolt
with a clip. Can I change this
safety so that I can use this gun
without being scared, someone could
of been killed.

Please write and give a answer

Please forward this to someone who
will answer me on this, I do
like Remington I have 7 of them. Thank you
