

Whom + May Concern:

Enclosed please find a Remington 270. I
returning this gun because there have
several problems with it and I
sider it to be unsafe to use. One
ne when the safety was clicked off
e gun shot without touching the trigger.
Recently the gun was shot and the
trigger released but the gun did not
fire until about ten (10) seconds later.
There has been about two (2) boxes of
shells shot through this gun and I do
not feel that it should be working in
such an unsafe manner. Please check
the gun completely and repair it, if
possible.

Thank you,

Phil Horton
