

So could you please fix it so it will work properly again? And be^{ing}

I also noticed that on your models that the safety can be let safe to open the bolt which I feel a great improvement over the old style which I have. If possible could, this new feature to my rifle please.

If you would like to or have questions please call me at (412) 295

Sincerely in y

P.S. If there are any changes for what I am asking of you or your company I am more than willing to pay them! Please make my 7mm safe and trustworthy again!

Don H.
