I'll return call.

Remington Arms - Sirs

Thank God I was taught safety! This rifle discharged <sup>with</sup> on me, without a jar or trigger pull of any kind. I removed shells and put it up for the time. Later, I went to use it, and it would not fire. I put it up, and got it out Friday to call you people, and it clicked again. (No Cartridges inside) I also noticed that if you release the safety it will fire if "cocked."

I understand that you can remedy my problem, so I put it in your hands. Your prompt attention will be appreciated.

Thank You  
Don Alderman
