CUSTOMER'S REQUEST "Customer says rifle fired twice when taken off safety"

MAIN FAULT (cannot duplicate door complaint. However, it was noted that the trigger assembly has been adjusted out of factory and is outside our specifications. 1) trigger pull measured at 2 1/2 pounds (trigger does not have positive retention) 2) over-travel is excessive. Also, it was noted that trigger assembly is extremely dusty and dirty. See left "007"
