

Remington
 Recently spoke with rep of
 your company about enclosed Rifle
 & was advised to send to this address
 for repair.

Recap of problem:
 Past couple years gun has discharged
 on 3 occasions w/o pulling trigger.
 Twice as gun was being placed in
 Fire position from safe and once when
 bolt was raised slightly to unload.
 Owner of gun was trying to show me
 what happens w/ the unloaded weapon &
 after placing gun on & off safety App 10
 times firing pin did fall on the empty
 chamber we then tried for App 12 hr
 to get it to do it again but was unsuccessful.
 Owner did state that on several occasions when
 gun was empty ~~this~~ this would happen either
 when placing gun in Fire position or when starting
 to bolt gun.
