Wilmington, DE 19898

Dear Sirs,

I own a Remington Rifle. Model 700 (308), Serial # 673992 which has on several occasions fired prematurely. This happens when taking the gun off safety.

I have been contacted several times by a law firm allegedly representing the family of a person killed or seriously injured by this gun, seeking my participation in a law suit or at least my testimony. I have indicated my refusal to participate. My stand in this regard is firm and nothing in this letter should be interpreted as any demand or threat.

My only interest is in being certain that the gun is safe. I will probably want to sell my guns in the not to distant future since I have reached the time in life when hunting has lost it's appeal.

Please provide me information on the steps necessary to insure that this gun is safe.

Sincerely

*Robert E. Brunk*
