STOMER'S REQUEST

fail on bolt closing

IN FAULT

*Cannot duplicate complaint. However, trigger assembly has been
tested outside of factory. Trigger pull manual at 2 1/2 pounds - this is
below our minimum spec; poor travel & excessive; rear engagement does
seem altered, but appears O.K. Removal of hardened action from stock revealed
wear on bottom of barrel, reaction and on trigger assembly. Sen-Lift, 0.10"*

RTS

*Clean up action & barrel, replace
trigger assembly at N/C, as gesture
of good will*

Please expedite, per K.O.G.
