Remington Arms Company Inc.
Service Division
New York 13357

Sir,

I have always been a Remington Arms man,
only firearms I use. But I've had trouble
with this gun for about 3 yrs. I took it
to a repair shop, and the man told me it
would be better to send it back to you than
let somebody else work on it.

This gun is very unsafe to use. It snaps
when you aim to fire it. Then about 2 to 3
seconds later it goes off automatically, and if
you were to be stand in a crowd of people
then it could be bad.

Would like to have you repair the gun
if possible.

Thank you.

Sincerely

Mr. Richard Croy
